

Certified Dealer Network Project Management Services

Solutions

Workplace assets managed professionally

Transforming your workplace into a strategic asset takes vision, creativity, and expertise. For a successful project—and your peace of mind—it makes sense to hire proven professionals.

Herman Miller's Certified Dealer Network offers a full range of project management services that help you create and sustain your work environment strategy. We're your single point of contact for information, communication, and action, providing efficiency and accountability throughout the process.

Pricing and budgeting

We prepare budgets and quotes for everything from product costs to delivery to installation. And we prepare a cash-flow plan so you can anticipate upcoming payments.

Planning and scheduling

We work with building contractors and architects to prepare and implement your project plan and schedule the resources necessary for timely completion.

Job-site coordination

From the beginning, we participate in construction coordination meetings. When the installation gets under way, we make sure it runs smoothly.

Project completion and quality control

We review and inspect the installation and follow up as needed.
